

Stallion Semen Freezing Request Form

Equine Cryogenic Services ~ EqCS
Division of Santolina Farm Inc.

Stallion Name: _____

Owner – Customer: _____

Semen Freezing Program selection – Please initial program for your Stallion.

A. _____ Stallion Sperm Bank Two – minimum safety net.....\$750 package price

This Program is for those stallion owners that want a small breeding stallion insurance policy (Limited Amount of Stored Frozen Semen) in the event that a stallion is no longer available due to illness, death or sale. The average stallion will produce about 8 to12 breeding dose units of frozen semen per ejaculate. Combining the total of 2 collections should yield about 16 to 24 breeding units of frozen semen or more. *For a small breeder, this "safety net" semen bank could be a breeding business life saver; should stallion loses breeding soundness, expire or be sold.*

Frozen Semen can be stored for many years when stored in liquid nitrogen, possibly indefinitely.

The Stallion Sperm Bank Two includes:

- Freezing 2 ejaculates or 2 containers received Fed Ex, of cooled shipped semen.
- Semen extender used by EqCS as our most recommended Cryogenic Extender – MFR 5.
- Semen Straws, Cryo Labeled - .5 ml straws grouped 5 straws in each goblet, 2 per cane, labeled id.
- Test Thaw of "one" .5 ml straw for motility. No other testing will be done on limited semen.
- One month of storage in an EqCS liquid nitrogen tank. See storage fees.
- No guarantee as to the number of straws produced for semen received.
- Does not include any collection fees or shipping fees. Containers are available for rent.

B. _____ Stallion Sperm Bank Four\$1400 package price

This Program is for those stallion owners that want a small, yet larger, breeding insurance policy (Limited Amount of Stored Frozen Semen) in the event that a stallion is no longer available due to illness, death or sale. The average stallion will produce about 8 to12 breeding dose units of frozen semen per ejaculate. Combining the total of 4 collections should yield about 30 to 50 breeding units of frozen semen or more.

Frozen Semen can be stored for many years when stored in liquid nitrogen, possibly indefinitely.

The Stallion Sperm Bank Four includes:

- Freezing 4 ejaculates or 4 containers received Fed Ex, of cooled shipped semen.
- Semen extender used by EqCS as our most recommended Cryogenic Extender – MFR 5.
- Semen Straws, Cryo Labeled - .5 ml straws grouped 5 straws in each goblet, 2 per cane, labeled id.
- 2X - Test Thaw of "one" .5 ml straws for motility. No other testing will be done on limited semen.
- One month of storage in an EqCS liquid nitrogen tank. See storage fees after one year.
- No guarantee as to the number of straws produced for semen received.
- Does not include any collection fees or shipping fees. Containers are available for rent.

Customer has Read Biological Products Agreement with Notice and Waiver of Liability, Understands Agreement with Notice and Waiver of Liability Conditions and Accepts the Terms of This Agreement. Customer has completed Santolina Farm Board Contract for onsite boarding, collecting and/or semen storage.
